

**Energy Efficiency Associate
Long Beach, California**

Energy Solutions was founded in 1995 to address climate change and sustainability issues through energy efficiency and renewable energy sources. As one of the leading consulting firms in our field, we specialize in energy efficiency program and project design, implementation, and marketing, as well as solar and other renewable energy system feasibility studies, project development and financing and water conservation programs. In our 15 years, we have built a solid reputation for quality services that routinely exceed our utility, governmental and private sector clients' expectations.

Energy Solutions is a fast-paced and innovative firm with 60+ employees. We are rapidly expanding our client base, as well as developing new services for clients. We are seeking to fill an Energy Efficiency Associate position. Candidates should possess a degree in an energy-related discipline; engineering, environmental policy, business, and natural resource backgrounds are all applicable. Professional experience is a positive, but not required. Strong writing and verbal skills are required, as is experience using Microsoft Office.

We expect employees to manage project tasks with minimal oversight. Responsibilities will include working with Energy Solutions' management to identify and schedule resources to complete projects, conducting literature searches, interacting regularly with customers, monitoring the progress of projects, communicating progress to management and clients, and bringing projects to a conclusion.

As a member of the Energy Solutions team, you will experience all of the benefits of working for a small company: opportunities to manage projects, close working relationships with colleagues, an active role in shaping company direction and your own future, and flexibility in work schedules. At the same time, you will have a broad impact on energy efficiency markets and greenhouse gas reductions through our work for major California and Nevada utilities, the California Public Utilities Commission, and other national leaders in energy efficiency. This unique blend creates a perfect environment for individuals who want to have an active voice in shaping the energy future in California and beyond.

Our company headquarters are located in downtown Oakland, California. We are currently expanding our business to include a growing southern California client base and recently established a small satellite office in Long Beach. Compensation is commensurate with experience, and includes a generous retirement package. Energy Solutions provides an excellent benefits package, including medical, dental and vision insurance, and other pre-tax contribution plans. Please email a cover letter with your available start date and your resume to jobs@energy-solution.com. For more information about Energy Solutions, please visit us on our website at www.energy-solution.com. Information will be requested to perform the compulsory background check. EOE.
