

## **Software Design Project Manager Job Announcement**

Energy Solutions was founded in 1995 to address climate change and sustainability issues through energy efficiency and renewable energy sources. As one of the leading consulting firms in our field, we specialize in energy efficiency program and project design, implementation, and marketing, as well as solar and other renewable energy system feasibility studies, project development and financing and water conservation programs. In our 15 years, we have built a solid reputation for quality services that routinely exceed our utility, governmental and private sector clients' expectations.

Energy Solutions is a fast-paced and innovative firm with 60+ employees. We are seeking to fill a Software Design Project Manager position in support of our projects emphasizing Information Systems solutions for energy efficiency and sustainable energy programs. As a member of Energy Solutions, you will experience working for a growing team, delivering support to our existing technical staff who externally deal with all Information Systems program related projects, while at the same time have a broad impact on energy efficiency markets and greenhouse gas reductions through our work for major California and Nevada utilities, the California Public Utilities Commission, and other national leaders in energy efficiency.

Daily responsibilities include but are not limited to:

- Collaborate with IS team on analysis, design, implementation and verification of computer software systems
- Create and execute project plans and revise as appropriate to meet changing needs
- Draft new requirements specifications for changes requested by clients.
- Compile documentation of program development and subsequent revisions
- Interact regularly with technical team and clients, monitor the development of projects and communicate progress to management and clients
- Maintain existing client relationships and cultivate new business relationships

Minimum qualifications:

- Strong written and verbal communication/presentation skills
- Project management and client management experience
- Software design experience (such as business and functional requirements, user interface/human factors, software design processes, focus groups, usability testing, wireframes, visual design)
- Two to four years of industry experience
- Bachelor's degree
- Energy efficiency/renewable energy domain experience a plus
- Developer skills a plus

Our BART-accessible office is located in downtown Oakland, California. Compensation is commensurate with experience, and includes a generous retirement package. Energy Solutions provides an excellent benefits package, including medical and dental insurance and other pre-tax contribution plans. Please email a cover letter with your available start date and your resume to [jobs@energy-solution.com](mailto:jobs@energy-solution.com). For more information about Energy Solutions, please visit us on our website at [www.energy-solution.com](http://www.energy-solution.com). Information will be requested to perform the compulsory background check. EOE.
